

# Defensive Dual Index Plan (UK and US) Issue 33

The Plan provides the potential to receive capital growth of 7% p.a. depending on the performance of the FTSE 100 Index and the S&P 500 Index.

The full Investment Term is six years. However, the Plan has the potential to mature early (kick-out) and pay back Initial Capital plus a defined capital growth amount on any anniversary date from the second year onwards. If, on any anniversary from year two, both the FTSE 100 Index and the S&P 500 Index are at or above their Initial Index Levels, the Plan will close and return Initial Capital plus 7% capital growth for each year that has elapsed.

Where the Plan has not closed early and runs to the full six year term, the required kick-out levels reduce to 50% of their Initial Index Levels on the Investment End Date.

### Notes to historical performance

Performance based on a rolling basis data range over the past 15 years. Percentage outcome reflects the number of occurrences where the performance of the Indices would have triggered the specified return in the given year. Please note that the results of the historical back testing should be treated with caution because it is not a reliable indicator of future performance and it assumes that the same product terms had been offered throughout the back testing period.
